

CINCINNATI BELL TELEPHONE COMPANY LLC
Local Telephone Service Agreement - Kentucky

Section 11 – Trunk AdvantageSM

A. TERMS AND CONDITIONS

TRUNK Advantagesm provides exchange access service at a 1.544 Mbps (DS-1) interface.

TRUNK Advantagesm Service consists of a DS-1 Digital Trunk Facility and up to twenty-four (24) 64 kbps Digital Trunk Channels. Digital Trunk Facilities and Digital Trunk Channels are not offered separately.

Three types of Digital Trunk Channels are available, as follows:

Standard channels which provide the same features as analog trunk lines found in Section 4 of this Agreement.

Direct Inward Dialing (DID) channels which provide Direct Inward Dialing service.

Two Way DID Channels which provide capability for two way standard service and Direct Inward Dialing service.

Trunk channels may be purchased with flat rate or measured rate service. The measured rate service regulations listed in Section 4 of this Agreement apply to Trunk AdvantageSM measured service trunks and channels. With measured service, the Customer will be billed for local usage determined by the number, distance, duration, and time-of-day of originated calls. Mixing measured and flat rate service on the same continuous property is prohibited except where the two services are used for separate purposes and are not used to supplement each other.

DID trunks and DID Number Blocks must be purchased in accordance with this section of this Agreement and at the prices shown for Trunk AdvantageSM in the Price List section of this Agreement.

The Customer is responsible for any long distance service charges, special access mileage charges, and/or internet charges associated with the use of TRUNK AdvantageSM

All Digital Trunk Channels use MF or DTMF signalling.

TRUNK Advantagesm is offered only as nonresidential service.

The minimum period of service for TRUNK Advantagesm is 12 months.

TRUNK Advantagesm is furnished subject to the availability of suitable facilities.

Customers wishing to upgrade existing trunk service to TRUNK AdvantageSM will be charged the listed nonrecurring charges for the appropriate number of Digital Trunk Facilities and will have to convert to the DID rate structure listed in this section of this Agreement. Non-recurring charges on Digital Trunk Channels are waived for the existing trunks that are moved to TRUNK AdvantageSM. Any new channels added at the time of conversion to TRUNK AdvantageSM will receive nonrecurring charges.

When placing an order for service(s) a Customer may request a service date that is sooner than the standard interval service date. If the Company agrees to and meets the requested expedite date, an expedite charge will apply and will be in addition to installation charges and all other nonrecurring charges.

Section 11 – Trunk AdvantageSM

B. TRUNK ADVANTAGESM OPTIONAL FEATURES

1. Caller ID Service

This feature allows the Customer's telephone number to be passed to the called party. This feature is only available in central offices equipped with the proper equipment.

This feature works over digital channels only and is not intended for Integrated Advantage channels used to transport analog, local exchange service.

2. Channel Transfer Service

This feature allows the Customer to transfer an incoming call to another line and then hang up, leaving the other two parties on a two-way call and freeing up the Customer's line for another call. The Customer will be responsible for toll charges associated with the transferred call.

This feature is for digital channels only and is not intended for Integrated Advantage channels used to transport analog, local exchange service.

3. Integrated Advantage Service

Integrated Advantage Service provides exchange access and special access through a 1.544 Mbps interface. Integrated Advantage is available in two versions, as follows:

The standard version consists of a DS1 facility and up to twenty-four 64 Kbps channels that can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. At least 2 of the channels must be used for digital data service. The remaining channels can be used in any combination.

The Lite version consists of a DS1 facility and up to twelve 64 Kbps channels which can be used to transport local exchange service, Digital Trunk Service, Voice Grade Special Access Service, Digital Data Service and/or Frame Relay Service. At least 1 of the channels must be used for digital data service. The remaining channels can be used in any combination.

A special educational rate for the Lite version of Integrated Advantage Service is available for municipal, county, and state public schools and to parochial and private schools.

Flat Rate channels and Measured Rate channels are available for Digital Trunk Channels.

Regulations and Rates for Digital Data Service, Voice Grade Special Access Service, and Frame Relay Service are found in Cincinnati Bell Telephone Tariff FCC No. 35 Section 7.

C. RATES AND CHARGES

The rates and charges for all TRUNK AdvantageSM services are shown in the Price List Section of this Agreement.
